Cultural tourism & sustainable development

"ANIMA TERRA"

Mediterranean villages are precious cradles of cultural heritage and traditional identity. Through ANIMA TERRA, we are highlighting these lost treasures, strengthening villages that are resisting desolation and offering new dimensions of life to their inhabitants.

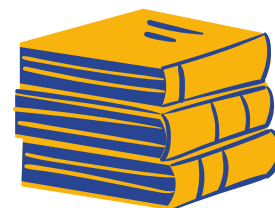

Equally important, however, is the alternative lifestyle they can offer today to city dwellers with ever-increasing living costs, few jobs and a polluted natural environment.

ANIMA TERRA incorporates modern technologies and innovations, such as digital technology and artificial intelligence, for the promotion and global promotion of local culture. This includes agri-food, gastronomy, handicrafts and local customs & traditions.

Tourism development: With ANIMA TERRA the promotion of sustainable tourism is central to the development of rural villages . We organize workshops, guided tours, cultural itineraries, hikes and thematic events, attracting visitors from all over the world and generating additional income for the village people, the "caretakers" of the green Mediterranean.
